

## **Career Pathways**

Career Pathways are designed to offer students a pathway to success. The Career Pathways booklet will provide a focus, and the foundation, for the students' learning experience. The student will develop a four-year high school educational plan based upon career/educational assessments that will maximize their post high school potential and opportunities. The EDP will enable students to make informed decisions that will better match their interests and aptitudes with their academic experiences. Students will continue to meet with their counselors and other resource staff throughout high school to review their progress toward achieving their goals and to further refine their academic and career plans.
